

REMARKS:

By the above amendment, applicant has amended the specification along the following lines:

In general, claims have been amended to introduce or clarify introductory phrases. The applicant respectfully requests that claims 26 and 27 be allowed in the current form.

The concrete modifications that have been performed are the following ones:

- Claims 1-7, 14 & 15: These claims cancelled and new method claims have been added that follow the existing system claims.
- Claim 19: Given that correcting this claim would require to add too many amendments, and that would render it very difficult to read, the amendment has been cancelled, and a cleaner version of it is included in new claim number 28.
- Claim 20: This claim has been amended to remove indefinite fragments.
- 21: This claim has been reworded to better show the means included in the system.
- Claim 24, 25: This claim has been amended to better clarify the context in which the samples of target language are used.
- Claim 27: This claim has been amended to better parallel the structure of claim 26.

The new claims that have been added are these ones:

- Claim 28: This is a reworded and simplified version of claim 19, now removed.
- Claims 29-35: These are method versions of claims 28, 20-25.
